### Curling Hair Like This Promotes Its Health

For those whose hair is straight and lacks nothing better could be recommended than the almirante method. This is a beautiful curling which is perfectly natural in appearance, and the health of the hair is not affected as when the heated iron is used. A few ounces of liquid almirante—which can, of course, be had at any drug store—lasts a long time, so it is quite economical to use. It is pleasant to use, too, being neither sticky nor greasy, and is easily applied with a clean toothbrush. The hair should be moistened the full length before setting. The pretty wavy curls in evidence in the morning is surprising to those who try this simple method the first time. The liquid also serves as an excellent dressing, giving the hair a delightful gloss.
